

# **REVIEW AND MONITORING OF SDGs after 2015: Models, Methods, Governance**

**Training Session**

**PART VII: Strengthening the review process for SDG  
Implementation**

**27-28 June 2015**

# Enduring global management illusion: Global governance (1)

- The global governance debate became part of a hegemonic discourse.
- It is hardly ever asked from such perspective how far effective sustainability and environment policies could be pursued against than under conditions of capitalist world market.

# Enduring global management illusion: Global governance (2)

- Under Washington Consensus orientation, eradicating poverty can be interpreted to the effect that it safeguards the ruling North-South relations.
- Global governance is understood in parts of the non-Western world as continuation of imperialism and as re-colonization through imperialistic institutions.
- MDGs and SDGs risk to continue with a top-down approach.

# Post-2015 Agenda in the horizon of a global social-ecological transformation (1)

- A clarification of the term “transformation” is needed.
- “Great transformation” (Karl Polanyi).
- Need to think transforming away from a capitalism that depends on fossil energy sources.
- Time to initiate the post-fossil age.
- Neoliberal capitalism contributed to a decline of solidarity.
- A radical diagnosis is being followed by rather toothless proposals.

# Post-2015 Agenda in the horizon of a global social-ecological transformation (2)

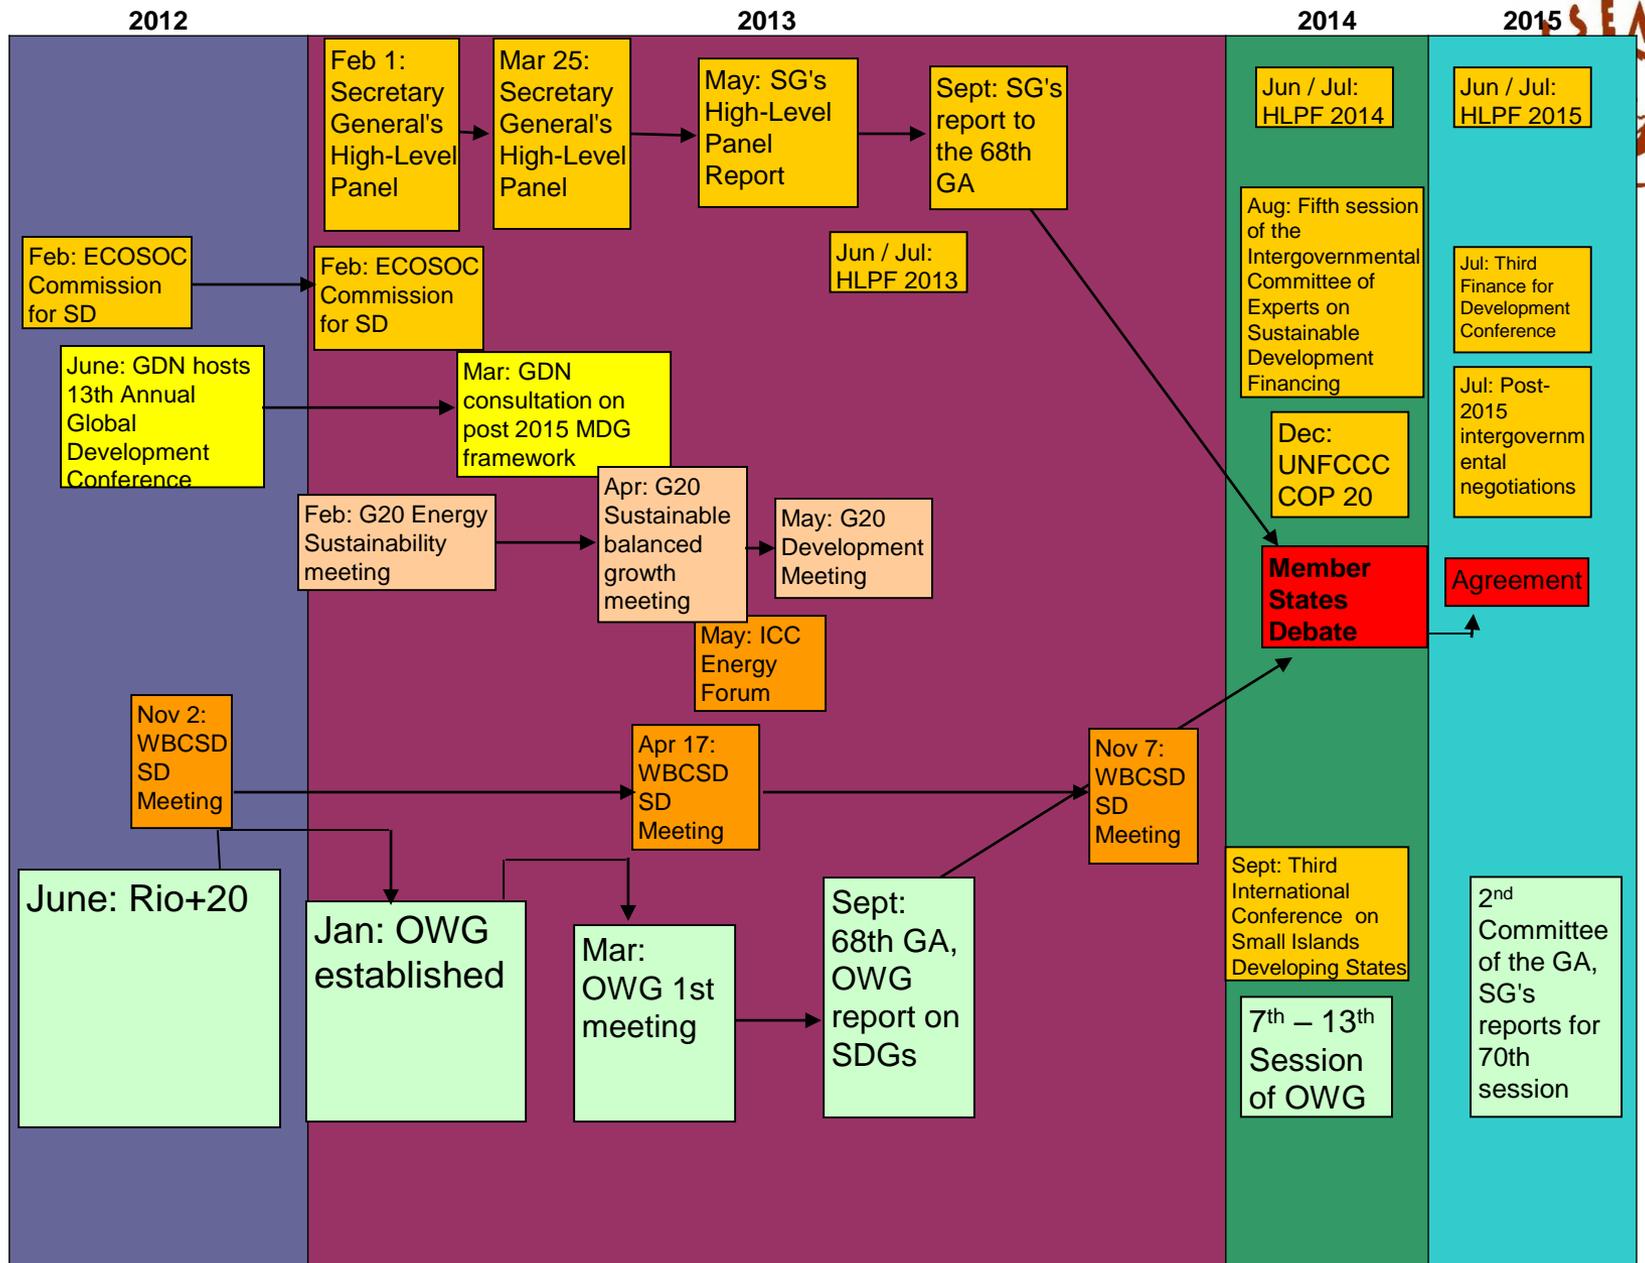

- **Constant self-revolutionizing of capitalistic societies becomes a problem.**
- **A global solidary modernity includes terms like “growth”, “development” and “progress”.**
- **A new model does not need to start from scratch. Need to consider already available approaches.**
- **A far-reaching reconstruction of the mode of production is required.**

# Securing a good review (1)

- While a number of delegates supported the use of a **High-Level Political Forum on Sustainable Development (HLPF)**, some differences emerged around its outputs and relationship with other institutions. as a key platform for review at the global level
- During the **May** post-2015 session, negotiating groups such as the G77/China said that other mechanisms and conventions should report to the HLPF, with regards to follow up.

## Securing a good review (2)

- Other nations cautioned against a centralised structure, calling instead for a system where the HLPF was supported by a network of existing review mechanisms, including other agencies with expertise relevant to elements of a list of proposed SDGs put forward by a dedicated UN working group last **July**.
- Talks since **January** focused on four substantive elements: a declaration, the SDGs, the means of implementation (Mol) for these, and follow-up and review modalities. A “zero draft” of the outcome circulated at the beginning of **June**.
- According to the processes’ current agenda, delegates should wrap up the post-2015 outcome talks by the **end of July**.

Diplomacy Dialogue

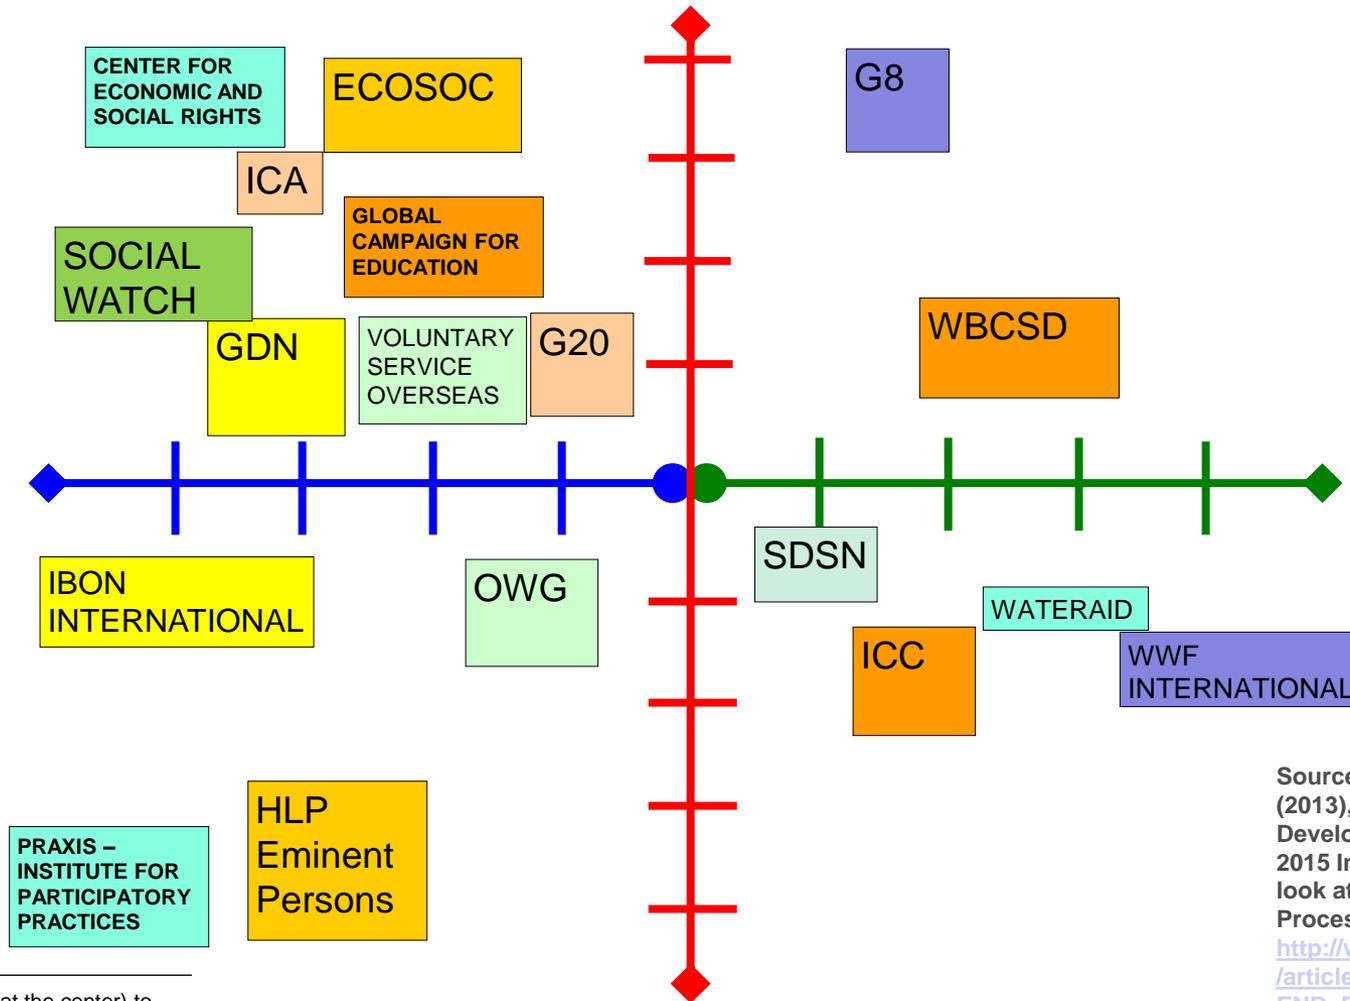

# Mapping of the Key Stakeholder Representation Groups in a Cross-Sector Grid

Economic Themes

Social Themes

Environmental Themes

### Legend

The scale ranges from 0% (at the center) to 100% (at the endpoints) corresponding to the focus the organization has to the four themes. Each tick-mark represents 20%.

Source: Based on CSEND (2013), Sustainable Development and the Post 2015 Implications: A Closer look at the MDG and SDG Processes, Policy Brief 12, [http://www.csend.org/images/articles/files/2013\\_07\\_06\\_CSEND\\_Policy\\_Brief\\_12\\_MDGs\\_SDGs.pdf](http://www.csend.org/images/articles/files/2013_07_06_CSEND_Policy_Brief_12_MDGs_SDGs.pdf), p.20

Global Governance Theme

## National

# Building blocks for a **voluntary, universal, periodic, state- led, participatory** Post-2015 review process

### Building on:

## National sustainable development strategy/plan

Translate global targets into national targets with adequate differentiation

## Global commitments

Review commitments with regard to global issues and need for/supply of means of implementation

## Policy framework

Review policies, structures and processes

## Outcomes and lessons learned

Review annual progresses and create knowledge on real-world implementation impact

- Annual progress report
- Whole-of-government body on SD
- Parliament, e.g. parliamentary body on SD
- National SD councils or similar bodies
- National statistical office and data
- Local authorities
- Multi-stakeholder dialogues, citizen reviews and participatory monitoring

**Building blocks  
for a voluntary,  
universal,  
periodic, state-  
led, participatory  
Post-2015 review  
process**

Building on:

## SDG trends

Discuss local, national and regional trends, based on indicators, data and progress reports

## Policy lessons learned

Mutual exchange of experiences with national-level implementation, best practices and challenges

## Regional issues

Discuss and find solutions for regional joint challenges and transboundary issues

## Thematic focus issues

Prepare input on HLPF annual thematic focus

- Existing regional reviews (APRM, Asia-Pacific Forum on SD, OECD reviews, et al.)
- Regional organizations (AU, EU, et al.)
- UN Regional Commissions
- Regional Development Banks

Source: UN (2015). Zero draft of the outcome document for the UN Summit to adopt the Post-2015 Development Agenda, p. 31,  
<https://sustainabledevelopment.un.org/content/documents/7261Post-2015%20Summit%20-%202020June%202015.pdf>

**Building blocks  
for a voluntary,  
universal,  
periodic, state-  
led, participatory  
Post-2015 review  
process**

Building on:

Source: UN (2015). Zero draft of the outcome document for the UN Summit to adopt the Post-2015 Development Agenda, p. 31, <https://sustainabledevelopment.un.org/content/documents/7261Post-2015%20Summit%20-%202020June%202015.pdf>

## SDG trends

Review global trends, progress and challenges, based on indicators, data and progress reports

## Country experiences with implementation

Mutual exchange of experiences with national-level implementation, best practices and challenges

## Means of implementation and partnerships

Review commitments, needs and implementation experiences, incl. through multi-stakeholder partnerships

## Thematic focus issues

Discuss annual thematic focus issues  
**UN system entities fit for purpose?**

- Global Sustainable Development Trends Report
- Global Sustainable Development Report
- Development Cooperation Forum, Global Partnership for Effective Development Cooperation, OECD-DAC Review, et al.
- UN system review and reports (AMR, UNFCCC, UPR, WTO trade review, et al.)
- Quadrennial Comprehensive Policy Review and UN entity reports
- Reports of partnerships and private sector, major groups and other stakeholders

## Building block: Country experiences with implementation

### Central part of HLPF review

Under the auspices of ECOSOC, building on and replacing AMR-NVPs

### Focus on national implementation efforts

- How do countries translate and implement SDGs?
- Take national strategies as point of reference
- Take national circumstances and capacities

### Visible, flexible and transparent process

Highlighting success models, challenges and potentials for improvement

### Incentives

- Visibility and knowledge sharing
- Motivate and inform effective planning, decision-making and investment
- Match demand and supply of means of implementation
- Platform for supportive partnerships

Source: UN (2015). Zero draft of the outcome document for the UN Summit to adopt the Post-2015 Development Agenda, p. 32,

<https://sustainabledevelopment.un.org/content/documents/7261Post-2015%20Summit%20-%20June%202015.pdf>

## HLPF: National voluntary presentations (ideally 2-3 in 15 years)

### Basis:

- National progress report
- Summary of input by Major Groups and other stakeholders
- Summary of UN entities' data and information

### Harmonized format for presentations

- For each SDG one best practice example
- For each SDG one challenge where tailored support would be appreciated
- First round: focus on national commitments and framework for implementation, also assess demand and supply of means of implementation
- Next round: focus on implementation experiences, follow-up of recommendations and effectiveness of measures and means of implementation

### State-led interactive debate

With suggestions and ideas for  
tailored support

### Results & follow-up

- Inform HLPF ministerial declaration
- UN system follow-up

# Building blocks Post- 2015 review process

Source: UN (2015). Zero draft of the outcome document for the UN Summit to adopt the Post-2015 Development Agenda, p. 32, <https://sustainabledevelopment.un.org/content/documents/7261Post-2015%20Summit%20-%202015.pdf>

# Proposed revision: Goal 17 Strengthen the means of implementation and revitalize the global partnership for sustainable development

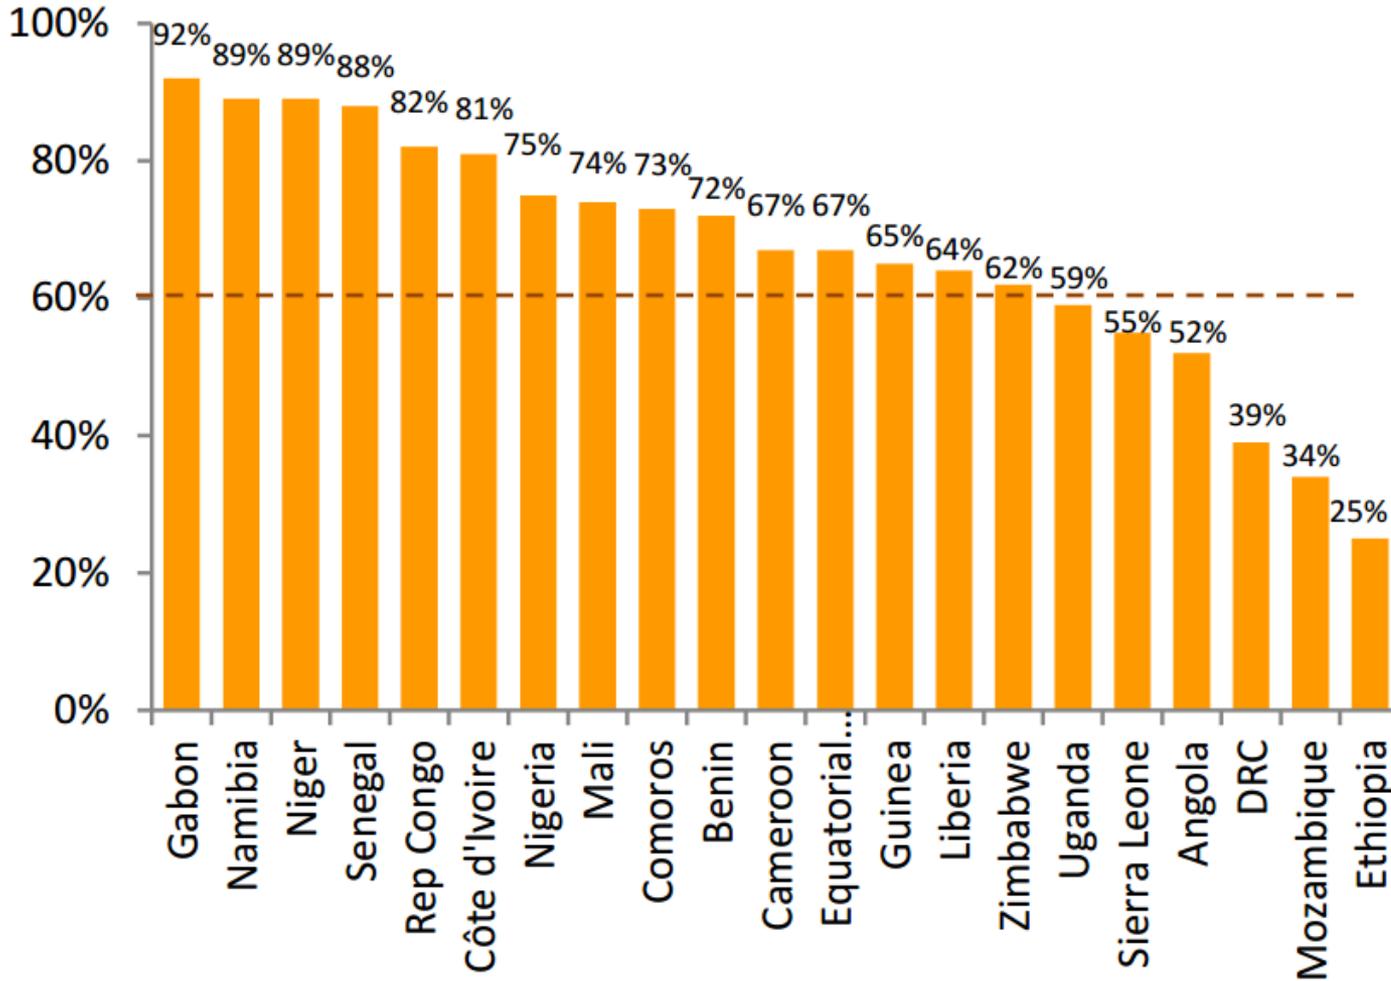

- “Developed countries to implement fully their official development assistance commitments, including to provide 0.7 per cent of gross national income in official development assistance to developing countries, if which at **least 0.15 to 0.20 per cent of GNI** should be provided to **least developed countries**, in line with the Istanbul Programme of Action.”

# Global Sustainable Development Report: Chapter 8 - Africa

- Only three African countries have data on all MDG indicators.
- Even when data is available, its frequency is low for some indicators.
- For sustainable development indicators, there have been calls to have data available annually.
- To address crisis and rapidly evolving situations, higher frequency data may be needed. Innovations can assist in many ways. They can automate tedious tasks and thus free up human resources for more challenging work. Innovations can make data more relevant by increasing its timeliness, its quality and its availability while cutting costs.
- **=> Innovative approaches in generating, collecting, analysing and using data are needed to monitor sustainable development progress**

# Percentage of households with mobile phones, 2011-2014

Source: UN (2015). GLOBAL SUSTAINABLE DEVELOPMENT REPORT, pp. 160,  
<https://sustainabledevelopment.un.org/content/documents/1758GSDR%202015%20Advance%20Unedited%20Version.pdf>

# Examples of innovative approaches

- Innovative data collection, integration and dissemination in Nigeria (<http://nmis.mdgs.gov.ng/>)
- Getting health and livelihood data through women informants equipped with smartphones (Drought Early Warning Program - DEWS)
- Getting data through free-SMS services (U-Report is a free SMS-based system)
- Using cell phone records to estimate population flows and design targeted policies against Ebola

# Examples of innovative approaches (1)

- Innovative data collection, integration and dissemination in Nigeria (<http://nmis.mdgs.gov.ng/>)
- Getting health and livelihood data through women informants equipped with smartphones (Drought Early Warning Program - DEWS)
- Getting data through free-SMS services (U-Report is a free SMS-based system)
- Using cell phone records to estimate population flows and design targeted policies against Ebola

# Examples of innovative approaches (2)

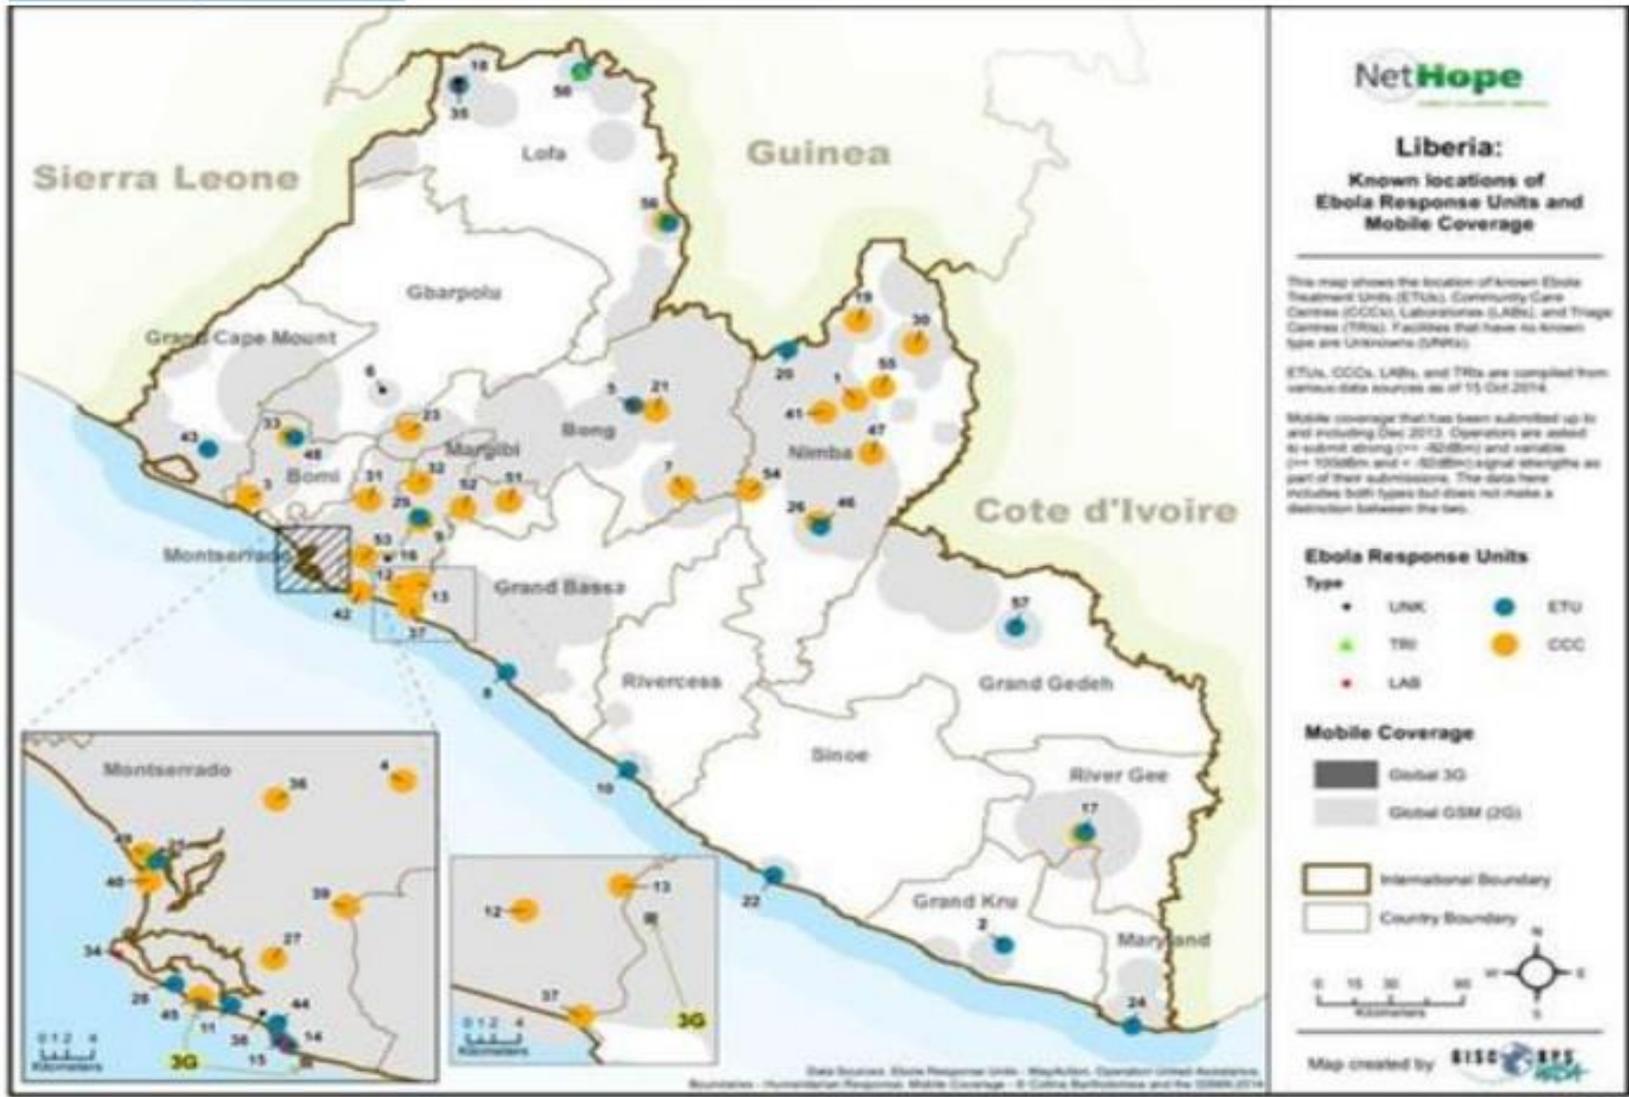

- **Using satellite data in Sudan for flood prediction and detection**
- **Geospatial technology for improved health and emergency planning in Egypt**
- **Using Earth Engine to assess socio-physical vulnerability to disasters in Senegal**
- **Mixing different data sources to improve the availability of climate data in Africa**
- **A geographical approach to land accounts in South Africa**
- **Open Data for Africa**

Diplomacy Dialogue

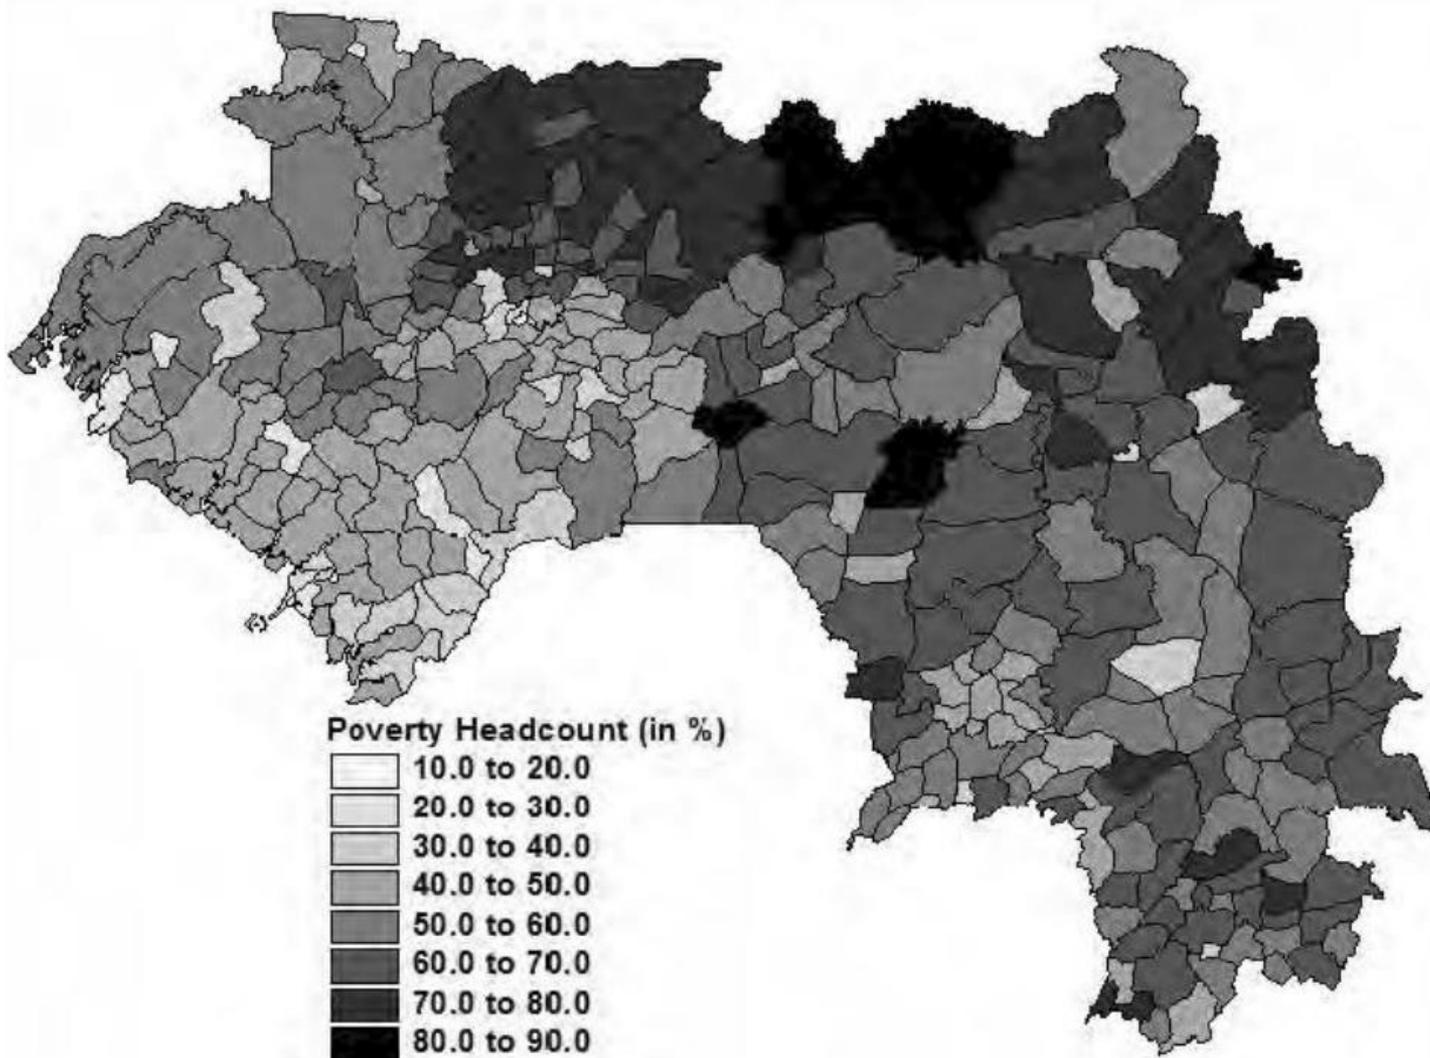

# Map of internet connectivity and Ebola treatment centres, Liberia

Source: UN (2015). GLOBAL SUSTAINABLE DEVELOPMENT REPORT, pp. 165, <https://sustainabledevelopment.un.org/content/documents/1758GSDR%202015%20Advance%20Unedited%20Version.pdf>

# Poverty map for Guinea, 2002/3

Source: UN (2015). GLOBAL SUSTAINABLE DEVELOPMENT REPORT, pp. 163,  
<https://sustainabledevelopment.un.org/content/documents/1758GSDR%202015%20Advance%20Unedited%20Version.pdf>

# Scaling up innovation in Africa: the way forward (1)

- **Novel approaches** to data can cover data gaps in areas covered by the SDGs
- High **mobile phone** penetration in Africa offers new monitoring opportunities
- The increasing use of **geospatial information** needs to continue
- Share data more effectively

# Scaling up innovation in Africa: the way forward (2)

- **High-quality impact-evaluation approaches** are being carried out in Africa but at a limited scale – policy-making would benefit from more studies of this kind
- **Country ownership and capacity building** will be key to implement data innovations
- Countries need access to independent advice on **new technologies and tools** and their relative strengths and drawbacks
- **Support data innovations** with stable, regular and predictable funding

# Example: Digital Watch (1)

- **Monitors main developments in the digital policy field.** Alongside the physical pillar of the Geneva Internet Platform, an **online pillar** involves the development of Digital Watch, a comprehensive Internet governance (IG) and digital policy observatory.
- **Will serve as a tool to provide a concise overview of all Internet governance and digital policy issues, actors and ongoing debates, building extensively on DiploFoundation's resources developed over the last 15 years and its in-house data-mining software system.**

## Example: Digital Watch (2)

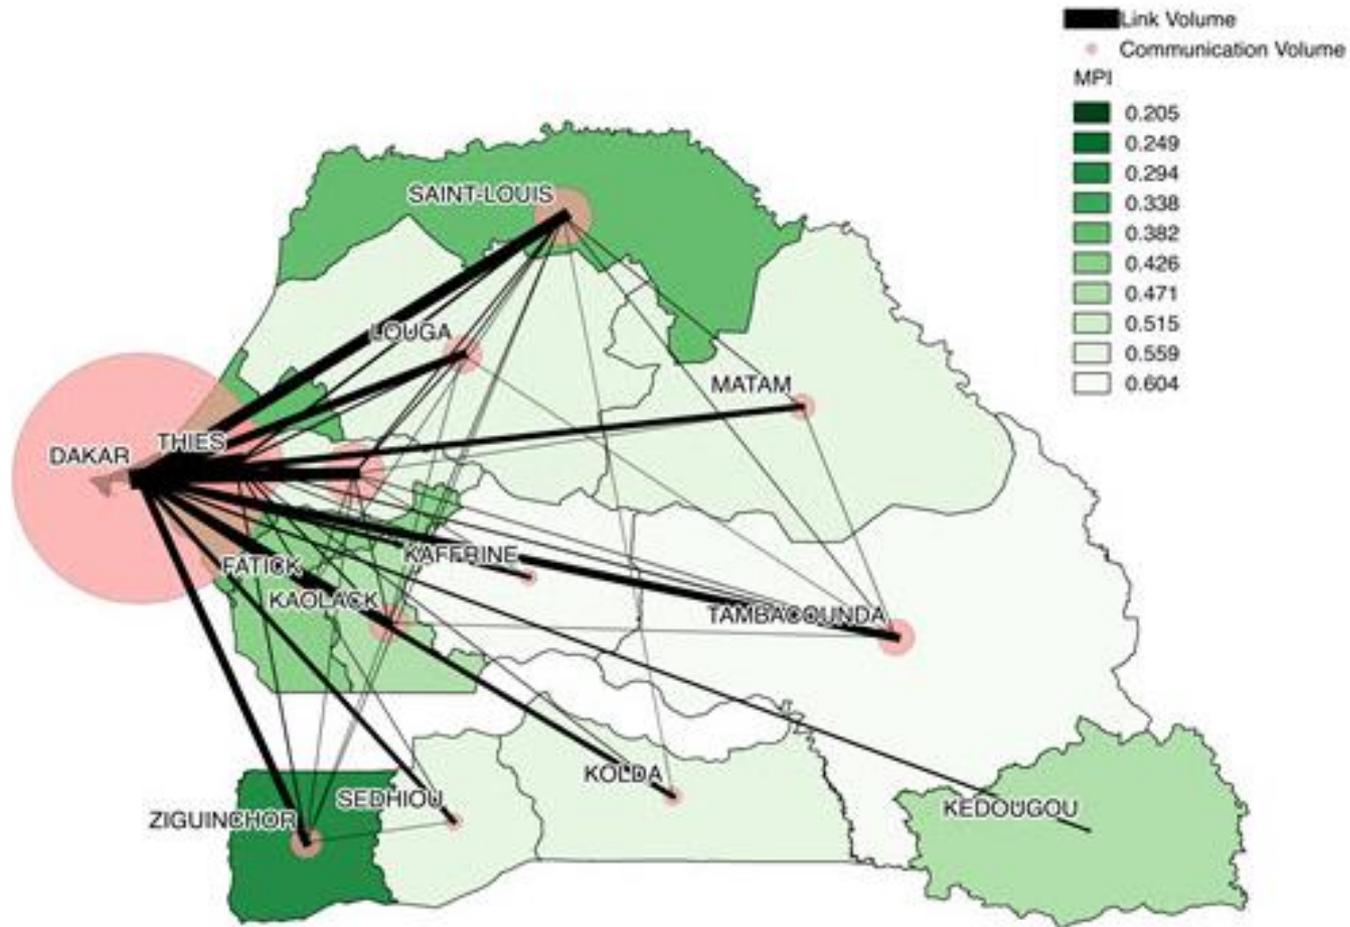

- The observatory will maintain a comprehensive summary of Internet developments and provide access to the latest research and data on Internet policy (the GIP's cutting-edge aspect).
- The Digital Watch will serve as a one-stop-shop for overview of related issues, featuring both explanatory texts and live updates.
- The main emphasis will be on **quantitative research (e.g. data-mining of open data, topic profiling)**, which is missing in the current IG research.

# Senegal: Big Data for improved diagnosis of poverty

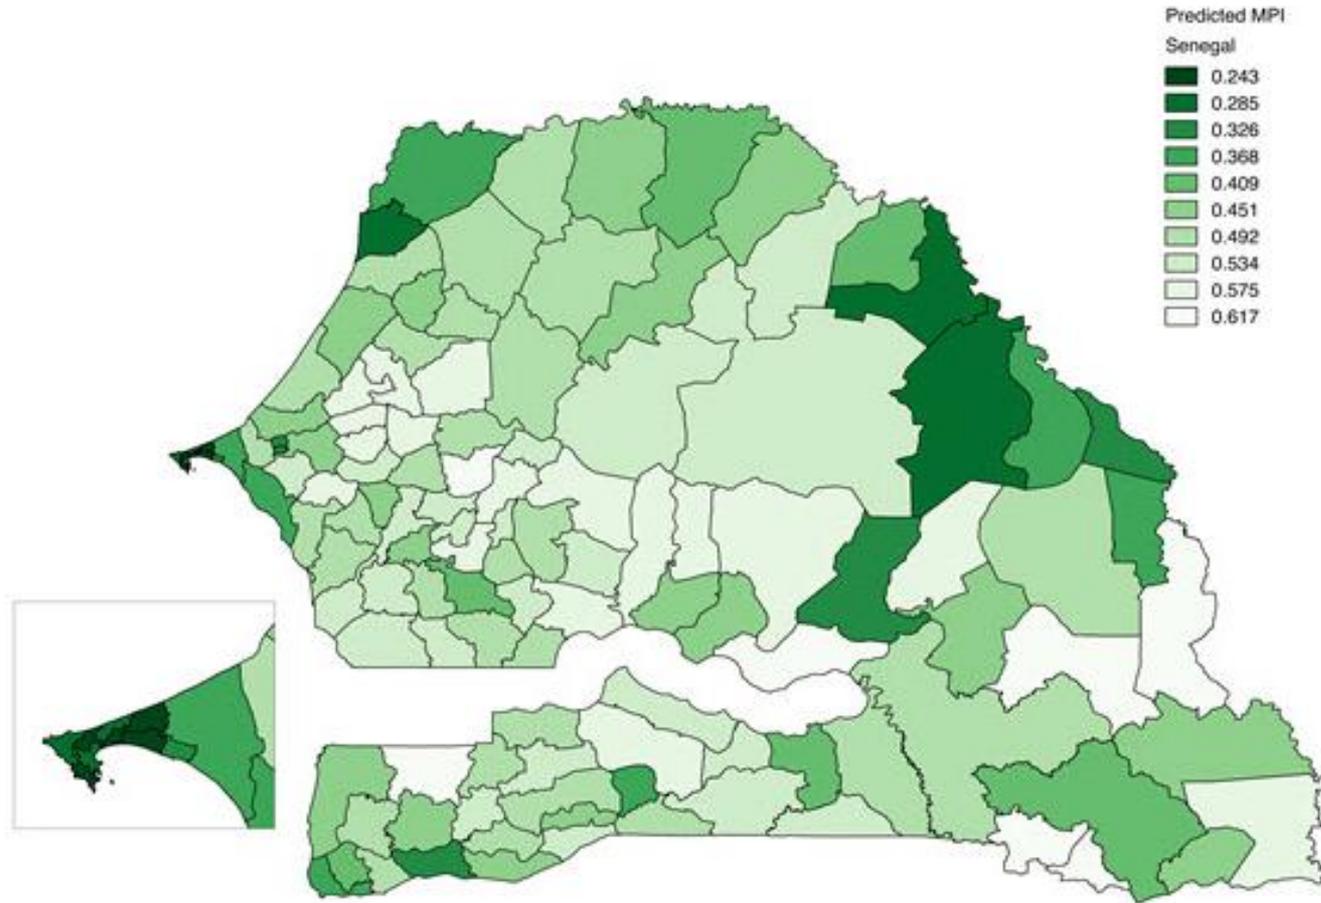

- In order to create detailed poverty maps, the virtual network of a country as a **“who-calls-whom” network** is defined.
- Macro-level view of connections or social ties between people, dissemination of information or knowledge, or dispersal of services.
- **Quantification** of the accessibility of mobile connectivity in Senegal, both **spatially and across the population**, using the CDR data.
- This quantification measures the amount of communication across various regions in Senegal. The result is a virtual network for Senegal.

# Virtual network for Senegal with MPI as an overlay

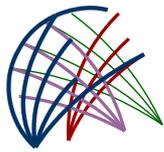

Source: Brookings (2015). Big Data for improved diagnosis of poverty: A case study of Senegal, <http://www.brookings.edu/blogs/africa-in-focus/posts/2015/06/02-big-data-poverty-senegal#.VXMF5IecxW4.email>

# Predicted poverty map at the arrondissement level for Senegal with MPI as an overlay

Source: Brookings (2015). Big Data for improved diagnosis of poverty: A case study of Senegal, <http://www.brookings.edu/blogs/africa-in-focus/posts/2015/06/02-big-data-poverty-senegal#.VXMF5IecxW4.email>

# Possible structure of a post-2015 international agenda in two parts

## Agenda 1: Human Development Objectives (final goals)

1. Reduction of income poverty
2. Food security
3. Education
4. Health and family planning
5. Infrastructure (energy, housing, water and sanitation)
6. Environment (clean air and water, protection of resources)
7. Resilience (human and social security)
8. Good governance (transparency, efficiency, political participation, human and civil rights)

## Agenda 2: Provision of Global Public Goods (Instrumental goals / enablers)

1. Limiting climate change
2. Joint global management of oceans, the atmosphere, space, the polar regions, fresh water resources
3. Containing infectious diseases
4. Improving the stability of financial markets
5. Creating an open, rules-based and fair system of world trade
6. Curbing international terrorism
7. Disarmament of anti-personal mines and weapons of mass destruction

Source: German Development Institute (2012). Post 2015: How to Reconcile the Millennium Development Goals (MDGs) and the Sustainable Development Goals (SDGs)?, Briefing Paper 18, <https://post2015.files.wordpress.com/2013/01/loewe-2012-post-2015-mdgs-and-sdgs-english.pdf>

# Strengthening the M&E system

- What is **realistically possible at different levels** (secretariat, country-level, civil society)?
- Implementation depends on **setting realistic objectives** to demonstrate results.
- Balance between **continuous monitoring** of trends (i.e. in a priority sector by the secretariat) with **fixed moments to assess progress** (i.e. bi-annually through dialogue or reporting)
- Mobilize **networks** to support continuous M&E

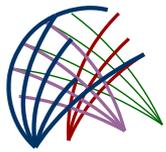

Process	Topic	Participation	Basis	NGO Participation	Frequency	Measurement of performance
TPR	Trade	Compulsory	Report by the WTO Secretariat + Policy statement by the Member	No	2 – 6 years	?
UPR	Human rights	Voluntary	“National report” + Reports of independent human rights experts and groups + Information from other stakeholders	Yes	2 cycles / UPR Working Group which meets three times a year	Yes
APR	<ul style="list-style-type: none"> <li>- Democracy and political governance.</li> <li>- Economic governance and management.</li> <li>- Corporate governance.</li> <li>-Socio-economic development.</li> </ul>	Voluntary	Background document + Issues Paper + Programme of Action	Yes	Every 2 / 4 years	?

Process	Strengths	Weaknesses
TPR	<p>Every WTO Member has to be reviewed.</p> <p>Special provisions for Developing Countries in the TPRM.</p>	<p>Not used as a compliance mechanism.</p> <p>NGOs and NSA not consulted.</p>
UPR	<p>All countries treated equally.</p> <p>Participation of NGOs and NSAs in the review process.</p>	
APR	<p>NGOs and NSAs consulted.</p> <p>Includes four different cross-cutting domains.</p> <p>Fosters national ownership.</p> <p>Programme of Action as a major concrete component.</p>	

# Criteria to compare review processes (1)

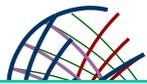

- **Who** is being reviewed
- By **whom**
- About **what** are they being reviewed
- Through what **processes** the review is to be conducted
- By what **standards** the relevant policies and practices are to be assessed
- What are the **potential effects** of the review

# Criteria to compare review processes (2)

<b>1. What? (Agents)</b>	Developed and Developing Countries and relevant UN entities -Collective or individual?
<b>2. By whom? (Principals)</b>	a) Horizontal -Each other? (Ministerial and other relevant high-level participants)  b) Vertical -Citizens? -People in some way affected by (in)action= -Future generations? (Participation of major groups and other relevant stakeholders)
<b>3. About what?</b>	Sustainable development commitments and objectives including those related to the means of implementation, within the context of the post-2015 development agenda -All commitments for each state, or a standard sub-set determined by level of development? -Specific commitments reviewed for all countries, or by region? -The three dimensions of sustainable development? -Implementation, or outcomes? -Coherence within the UN system?

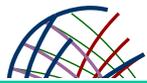

# Criteria to compare review processes (3)

<p><b>4. Through what process?</b></p>	<p>a) Transparency</p> <ul style="list-style-type: none"> <li>-What sources of information will the HLPF draw on? Will it be a mix of voluntary reporting and international organization data? Will these resources in themselves be publicly available?</li> <li>-Will the results of HLPF reviews be published, in detail or in summary? Will they be an input for the annual global sustainable development report?</li> </ul> <p>b) Surveillance</p> <ul style="list-style-type: none"> <li>-Mutual assessment/peer review?</li> <li>-Ministers themselves</li> <li>-Ad hoc working groups of officials expert in a given area</li> <li>-Reports by Secretariat?</li> <li>-Role of stakeholders and NGOs?</li> <li>-Review of reviews conducted by other bodies?</li> </ul>
<p><b>5. Criteria / Standard of assessment</b></p>	<ul style="list-style-type: none"> <li>-Effort, or results?</li> <li>-Ad hoc, or rooted in codified commitments?</li> </ul>
<p><b>6. With what effects on agents?</b></p>	<ul style="list-style-type: none"> <li>-Enhance capacity to learn and adapt</li> <li>-Withdrawal of peer esteem?</li> <li>-Both leading to policy change?</li> <li>-Access to the means of implementation? (Funds, technical support, etc.)</li> </ul>

Source: IISD (2014). Building an Effective Review Mechanism: Lessons for the HLPF, [https://www.iisd.org/pdf/2014/hlpf\\_review.pdf](https://www.iisd.org/pdf/2014/hlpf_review.pdf), p.2

# Case comparison (1)

Who? (Agents)	To whom? (Principals)	About what?	Through what process?	Criteria/Stand ard of assessment?	With what effects on agents?
------------------	--------------------------	-------------	--------------------------	---	------------------------------------

## New Partnership for Africa's Development (NEPAD)

33 countries (as of 2012) in the African Union	Members meeting as the African Peer Review Mechanism Forum	Policies/practices related to eight priority areas: political economic and corporate governance; agriculture; infrastructure; education; health; science and technology; market access and tourism; and environment.	Secretariat collects information from national and international sources. Review Team meets stakeholders; prepares report for review by the APR Panel before submission to the APR Forum. Periodic reviews every 2 to 24 years. Member countries can also initiate reviews upon request and there is also a provision for reviews if a member country is expected to face political or economic crisis.	Criteria are whether the government has taken the necessary steps to achieve the objective and attain the standards, and the effects or results of these actions. Indicators are used to determine whether the criteria have been met.	Foster adoption of policies that lead to political stability, economic growth, sustainable development and regional economic integration through experience sharing and enforcement of best policies, including identifying deficiencies and requirements for capacity building.
--	--	--	---	--	--

# Case comparison (2)

Who? (Agents)	To whom? (Principals)	About what?	Through what process?	Criteria/Standard of assessment?	With what effects on agents?
---------------	-----------------------	-------------	-----------------------	----------------------------------	------------------------------

## OECD Environmental Performance Review

<p>Individual OECD member countries</p>	<p>OECD members meeting as the Working Party on Environmental Performance</p>	<p>Progress towards sustainable development common for all countries. Includes key economic, social and environmental trends; policy making environment; and progress toward socially inclusive green growth. Two in-depth issues selected by reviewed country.</p>	<p>Periodic reviews of each member, or roughly 4-5 each year at an approximate cost of 300,000 EUR each. Review team includes experts from three reviewing countries, Secretariat and consultants. Information is collected from various parts of the OECD Secretariat and country under review. After stakeholder consultations, peer review takes place in the Working Party. Reports are subsequently published.</p>	<p>Reviews look at policy frameworks and implementation, and at qualitative measures of the achievement of targets. Have policy objectives been achieved efficiently (and effectively)? <b>Are the policy objectives based on assessment of benefits and costs?</b> Performance: distinguish intentions, actions, results.</p>	<p>The aim is to:          -promote peer learning          -enhance countries 'accountability to each other and to the public          -improve government's environmental performance, individually and collectively.</p>
---	---	---	---	--	--

## G20 Voluntary Peer Review of Fossil Fuel Subsidy Reform

<p>To be decided whether each G20 member will be reviewed, and periodicity.</p>	<p>Members of the G20, presumably meeting as the Working Group on Energy and Commodity Markets.</p>	<p>2009 commitment to “To phase out and rationalize over the medium term inefficient fossil fuel subsidies while providing targeted support for the poorest.” To be decided: review only subsidies that individual countries consider to be inefficient, or both efficient and inefficient subsidies granted to either producers or consumers.</p>	<p>Transparency: Voluntary reporting of fossil fuel subsidies and efforts to reform already exists, although reporting is inconsistent. Reviewers may choose to rely on published data from other sources, or additional inquiries, e.g. in meetings with the reviewed country officials. Surveillance: undecided. Three proposals: 1. Country Only Voluntary Peer Review (Groups of 2-4 countries agree to work with each other) 2. Third-Party Voluntary Peer Review by experts drawn from think tanks, academia, and international organizations 3. Hybrid.</p>	<p>Undecided: merely exchange of lessons learned or progress in meeting the fossil fuel subsidy reform commitment.</p>	<p>Understanding and comparison of each country’s fossil fuel policies; sharing reform experiences.</p>
---	---	--	--	--	---

# SDG monitoring & Data Revolution

- Data revolution can support innovative effort of SDG monitoring.
- Need to create feedback loops that will stimulate institutional learning and continuous innovation and transformation - including monitoring and review mechanisms
- Citizen technology can help to promote Citizen ownership of the SDGs and means to engage.
- Data Revolution should be considered from the perspective of Global public goods to create platforms for citizen engagement.

# Private sector inclusion in Review Frameworks

- Private sector provides the necessary **investment, infrastructure, jobs and capital** necessary to support development goals.
- When operating sustainably, the private sector has the potential to **address the gaps that public initiatives and public finance cannot.**
- **Core business practices** should be included in reviews concerning implementation of the SDGs.

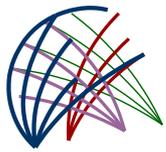

# Review Frameworks previously discussed

1. **national level reviews**, whereby member states report on their national progress to the HLPF;
2. **regional peer level reviews**, which are conducted by member states and given to regional bodies. These reports could be aggregated and then given to the HLPF;
3. **global level reviews**, where national or regional reports might be synthesized into a global report by an international body, such as the United Nations.
4. **thematic reviews**, which are reviews that reflect themes that are of current interest and relevance.

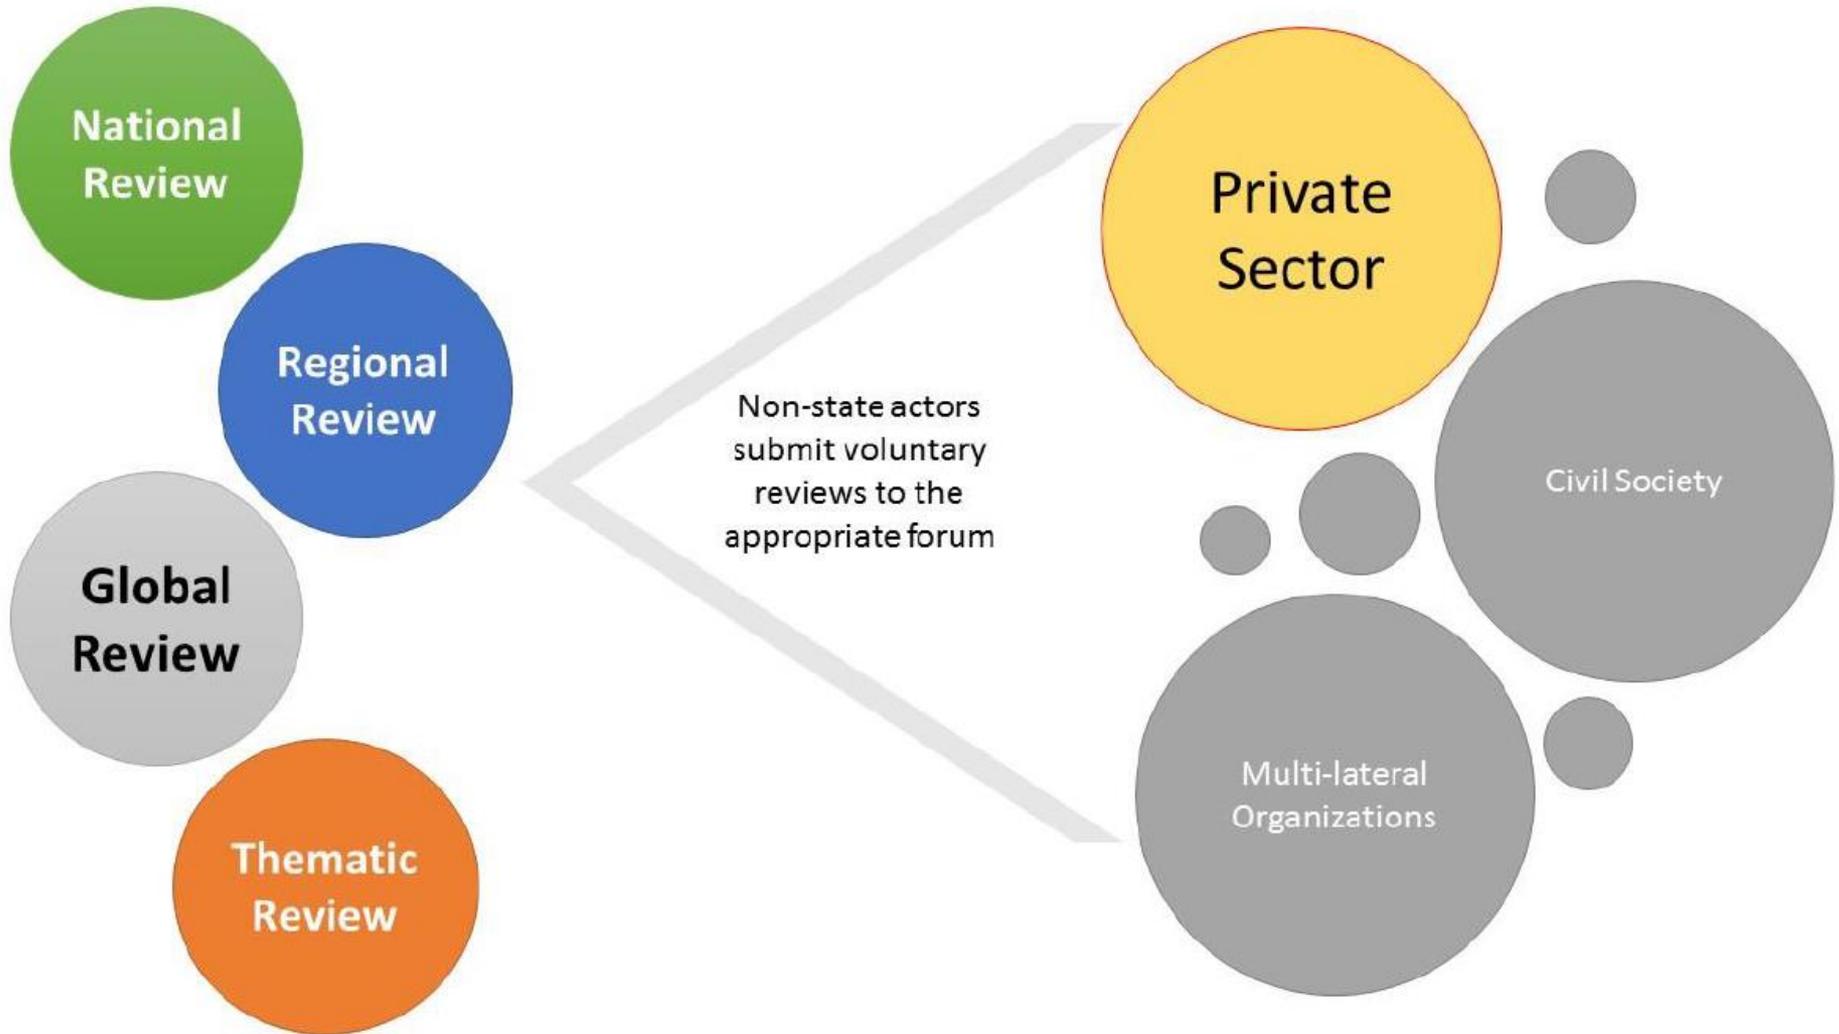

# National, Regional Global and Thematic Review

Source: Global Reporting Initiative (2015). Designing a follow-up and review architecture for the sustainable development goals: principles for private sector.

# New global partnership for Review & Monitoring

Source: Global Reporting Initiative (2015). Designing a follow-up and review architecture for the sustainable development goals: principles for private sector.

# Tool to measure business contributions to the SDGs

- GRI, in **partnership** with the United Nations Global Compact and the World Business Council on Sustainable Development.
- Key **performance indicators (KPIs)** that the private sector already uses when issuing their sustainability reports.
- Allows companies to **measure** their **impact** according to each of the SDG themes.
- Will be launched simultaneously with the SDGs in **September 2015**.

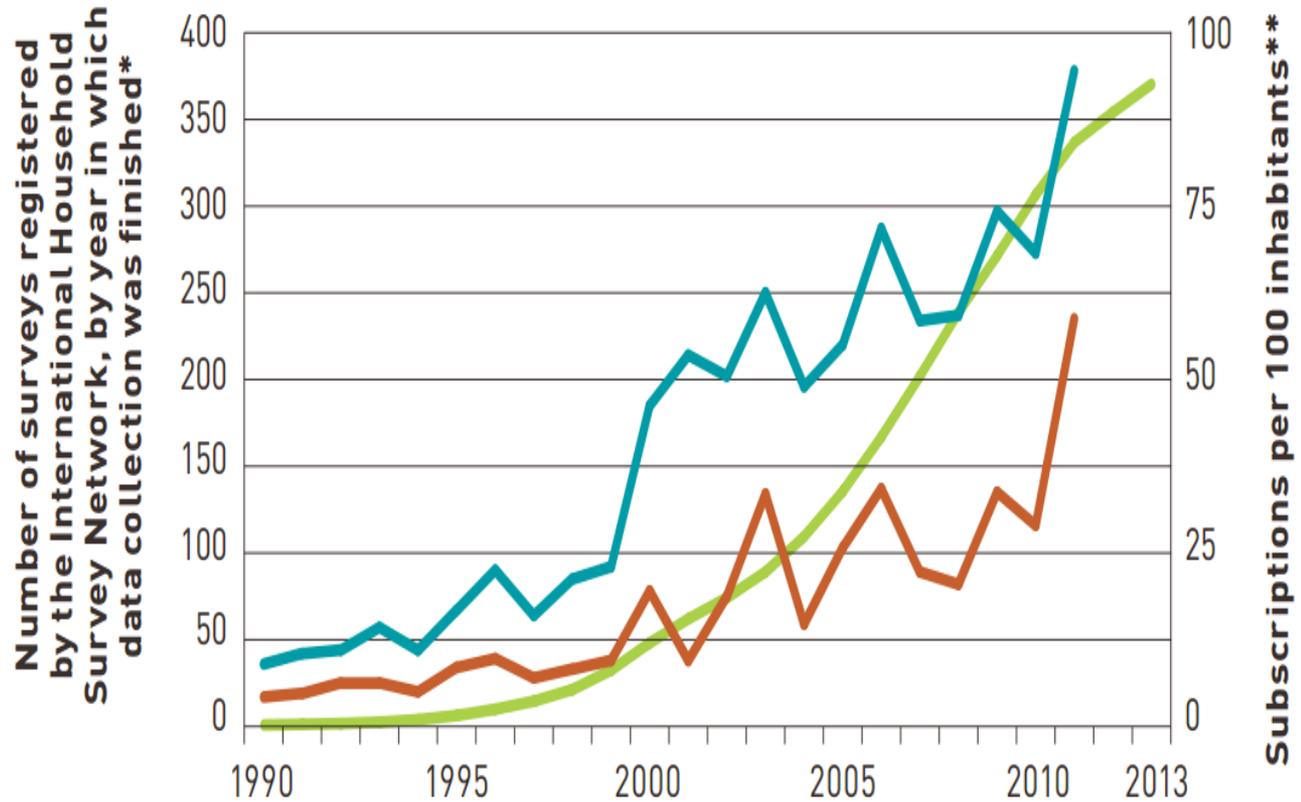

# GRI's Call to action for Member States

- **Craft language** within the post-2015 Outcome Document that specifically states that private sector review is encouraged.
- Develop a **clear review channel (official or voluntary)** or body where the private sector can send their reports.
- **Include private sector reviews** in country reviews or regional reviews.
- **Utilize existing reporting tools** so that companies have a structure with which to report.

# THE GROWTH OF DATA: TRENDS IN DATA AVAILABILITY, DATA OPENNESS AND MOBILE PHONE USE

- All Surveys
- Open Access Surveys
- Mobile-cellular subscriptions (per 100 inhabitants)

Source: UN) Independent Expert Advisory Group (2014). A World that Counts: Mobilizing the Data Revolution for Sustainable Development, p. 5, <http://www.undatarevolution.org/wp-content/uploads/2014/12/A-World-That-Counts2.pdf>

# Data Revolution for Sustainable Development

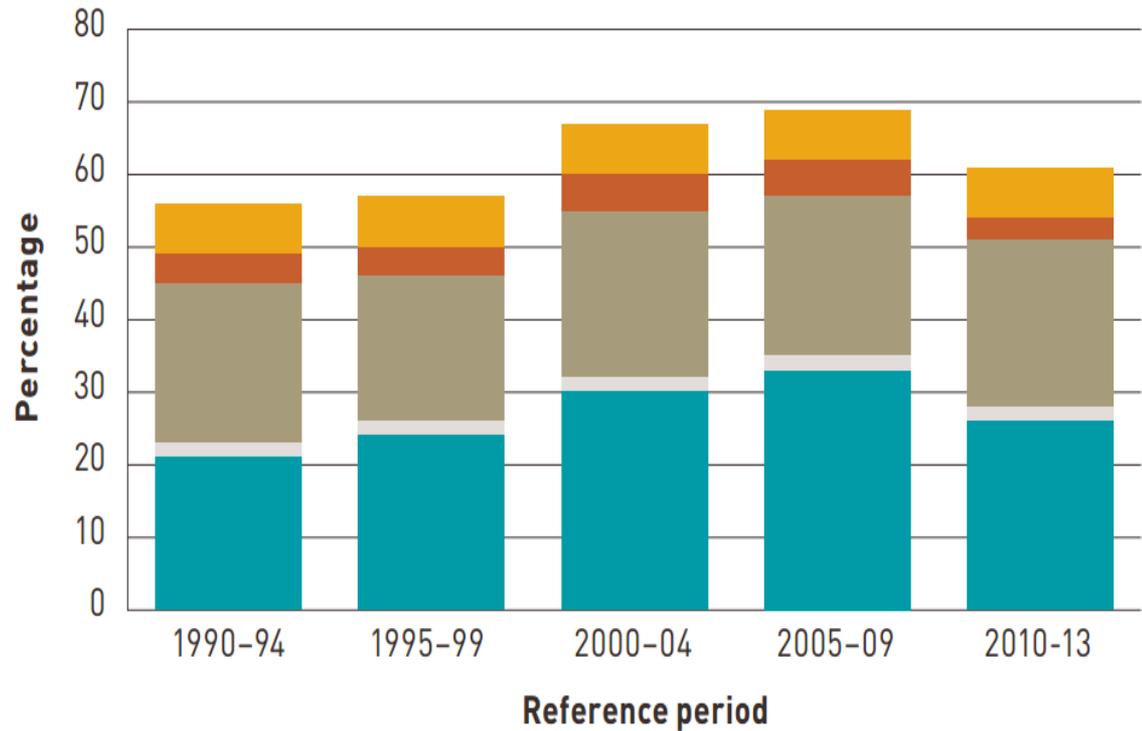

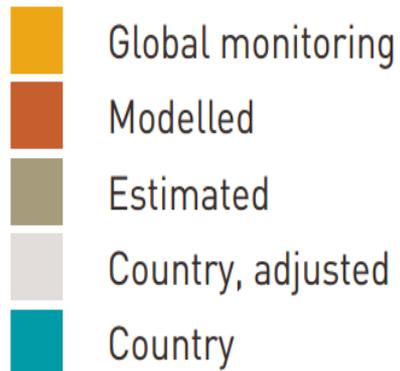

- Integration of new data with traditional data to **produce high-quality information** that is **more detailed, timely and relevant** for many purposes and users, especially to foster and monitor sustainable development.
- Increase in the **usefulness of data** through a much greater degree of **openness and transparency**, avoiding invasion of privacy and abuse of human rights from misuse of data on individuals and groups, and minimising inequality in production, access to and use of data.
- **More empowered people, better policies, better decisions and greater participation and accountability**, leading to better outcomes for people and the planet.

## PERCENTAGE OF MDG DATA CURRENTLY AVAILABLE FOR DEVELOPING COUNTRIES BY NATURE OF SOURCE\*

Nature of data source:

\* Availability is defined as the proportion of country-indicator combinations that have at least one data observation within the reference period. Figures are based on 55 MDG core indicators, as of October 2014.

# Data Revolution for SD: Key principles

- 1. Data quality and integrity**
- 2. Data disaggregation**
- 3. Data timeliness**
- 4. Data transparency and openness**
- 5. Data usability and curation**
- 6. Data protection and privacy**
- 7. Data governance and independence**
- 8. Data resources and capacity**
- 9. Data rights**

**Thank you**
